

# LEAP

No-Code App Factory

"LeapXL has an easy-to-implement, cloud-ready technology platform to build or adapt applications very quickly as market needs evolve."

Abe Hadad, Executive Director, Tax Technology, Ernst & Young

This is the LEAP no-code platform which simplifies and automates the tasks of **creating, evolving and maintaining software.**

The Leap platform is designed to help you develop software faster and with fewer technical resources.

LEAP will revolutionize your approach to modernization and be your competitive advantage.

## FEATURES

Capability and Flexibility to generate enterprise-grade software

Modular and Composable so you can build software and then recombine it for similar software

Rebrand and Modify

Integrate with Other Software with tools to handle API connections

Reduce Ongoing Maintenance and Technical Debt

LeapXL's no-code platform integrates any data set to build UI/UX fabric to meet your customers' needs quickly and securely. Build powerful software in just a few weeks without having to code.

Marla Johnson | LeapXL CEO

# Modernize your software or bring new products to market.

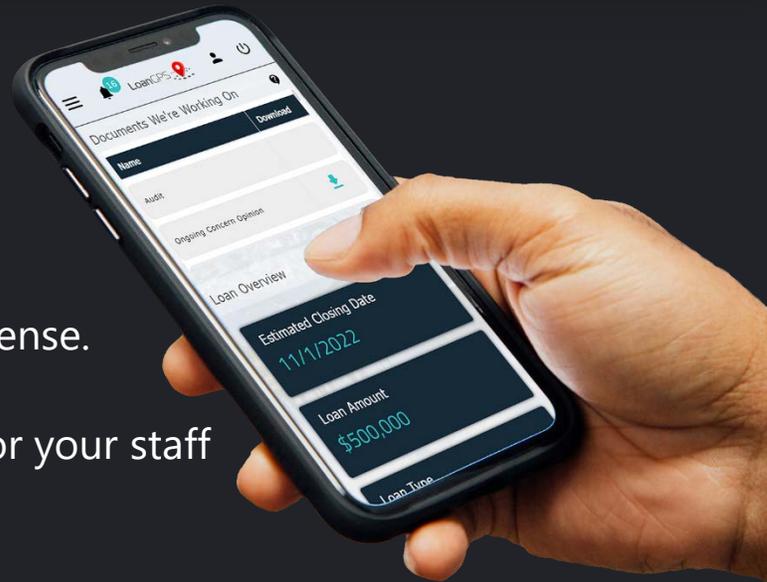

LEAP adds data interoperability, API extensibility and UI/UX flexibility so you can innovate anew or extend legacy with plug-and-play modules.

## Ways to get No-Code App Dev Power with LeapXL

**Leap Studio** – Embed two Leapers with platform knowledge to build software with your team along with a platform license.

**Leap No-Code Factory** – Get training for your staff to build software and a platform license.

**Leap SaaS** – Use a LeapXL team to build your software and deploy it on your private cloud.

Just connect, drag, drop and deploy to make fully scalable software systems. Access the most powerful tech in the world via APIs and assemble cross-production offerings with the velocity and ease needed in today's consumer environment.
