

LEAP

Leap Over Your Backlog

The LEAP Platform simplifies and automates the tasks of software development teams as they create, reconfigure and maintain software.

The Leap platform is designed to help you develop software faster and with fewer technical resources.

LeapXL is the future of software development, accelerating the software development lifecycle to deliver secure desktop and mobile applications in one-fourth the time.

Real Tech Value:

- 1. Visual App Building:** Create software applications without having to write code.
- 2. Composable Software Architecture:** Software components can be reconfigured and used in other solutions.
- 3. Automated Secure Deployment**
- 4. Simplify API Complexity:** Built-in AI tools to structure data and integration.

LeapXL has an easy-to-implement, cloud-ready technology platform to build or adapt applications very quickly as market needs evolve.

Abe Hadad, Executive Director,
Tax Technology, Ernst & Young

Modernize software apps or bring new products to market.

LEAP adds data interoperability, API extensibility and UI/UX flexibility so you can launch new products or extend legacy software applications.

- **Improve customer experience:** for multiple devices.
- **Increase transparency:** Help customers navigate their relationship with you.
- **Automate tasks:** Use our AI and no-code platform to automate manual tasks including data entry and order processing for faster customer support.
- **Integrate with other systems** to improve efficiency and streamline operations.
